

About Me

I'm a Font-end Developer fourth-year Computer Science student at Bangkok University. I'm interested in Front-end development and application / Web development , and I have participated in a food ordering app project , which helped me develop skills in coding , using HTML , CSS and JavaScript , as well as UI/UX design and problem-solving. I'm eager to use this internship opportunity to learn new coding languages such as React , Flutter and responsive web design , and I will strive to fully support the team's work without being a burden

Skill

- HTML5
- CSS+
- Java Script
- GitHub
- Figma
- React Native
- React + Tailwind

Study

2025 ● Bangkok university

Technology and innovation ,
Computer Science Major
GPA 3.65

Experience

2025 ● Project

Font - End

- Food Ordering App (Moom Aroi) I participated in the development of a food ordering application called "Moom Aroi," where I developed the front-end using React Native. This mobile application enables users to browse menus, place orders, and manage deliveries seamlessly. The project helped me enhance my skills in coding with HTML, CSS, JavaScript, and React Native, as well as UI/UX design and problem-solving.
- Web Grow Project Currently working on a final-year project (to be continued into Semester 1), responsible for front-end development using React and Tailwind CSS to design and develop user interface components. I have been tasked with writing the front-end for the Home, Homepost, Sigin, Joinnow, Login, Post, and Find pages. I have also collaborated with the back-end team to integrate data into the front-end during development.
- Web Profile Created a personal web profile using HTML and CSS, showcasing skills, experiences, and portfolio items with clean, responsive design. In addition, it includes Home, About Me, Skill, and Performance pages.
- Web Potfolio Final This website was developed using CSS and HTML, featuring a Home page, a Skills page, and an About Me page.
